TOUGHBOOK CF-30

As fully ruggedised reference model the CF-30 unifies a whole host of innovations and rugged features. Its 13.3" touchscreen display features an outstanding brightness of up to 1000cd/m2 that guarantees brilliant visibility even in glaring environments. Constructed using an ultra strong magnesium alloy case, the CF-30 is vibration and shock resistant to MIL-STD 810F and comes with a shock-damping foam packed HDD casing, enabling it to withstand drops from a height of 90cm. A special HDD-heater allows for operating under extreme cold conditions while the anti-reflective silver painting on the casing and the carry handle with integrated touchpen holder prevent heat absorption in bright outdoor conditions. All joints and external covers are sealed providing the unit a dust and water resistance to the IP54-standard. The 'hot swapping' multimedia pocket gives the flexibility to swap between several drives and even a secondary battery.

The Intel® Centrino® Duo Processor Technology with Intel® Core™ 2 Duo Processor promises high performance and efficient energy consumption. Thanks to two Diversity-WLAN-antennas located in the top of the display unit an optimum WLAN data transfer can be achieved. The high-power battery allows for a running time of up to 7 hours.
